ECSed28302 : Creation of version 199 MISR ESDT based on current version 1 ESDT

The LDAAC needs these for Public Release.

Ref: TT 3375 written at LaRC requesting V199 ESDTs.

24. Proposed Solution: (use additional sheets if necessary)
Provide the 199 MISR ESDTs to LDAAC DAAC.
Contained in ESDT TAR file #18.

25. Alternate Solution: (use additional sheets if necessary)
Wait for 5B.06 release

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Problems with Public Release or delays in INGEST of data.

27. Justification for Emergency (If Block 15 is "Emergency"):
ESDTs are needed at the LDAAC for immediate testing before public release of data.

Title of Change: Test Executable 5B.05_ESDT.04 for LDAAC, PVC, and VATC. Creation of version 199 MISR ESDT based on current version 1 ESD.

This Test Executable series [5B.05_ESDT.xx] is being delivered as a series of TAR files delivering related ESDTs. Each DAAC will need some of these ESDTs but not all. Review each TAR file for your sites needs and take only the ESDTs that will be required for your needs.
Note: Each TAR file listing shows the NCRs addressed and the first line description of the NCR. (see below)

This TE can be loaded on top of 5B.03, 5B.04 installations.
The previous TEs for ESDTs [5B.05_ESDT.01 and .02 and .03] are still valid. Any ESDTs required by a DAAC should be taken from ESDT.01 first and then take any ESTDs needed from 5B.05_ESDT.02 and so on. Updates and installs should follow this same pattern.

CM:
Please Build the SUN TAR Files (#18) for the merged ESDT files from current 5B baseline (5B.06) as listed below and provide as Test Executable 5B.05_ESDT.04. Provide the Tar files to the SMC.

SMC: provide the noted TAR file[s] to all DAACs, PVC and VATC.

DAAC Install Instructions:

1. Identify the proper Test Executable files
   Get Files listed above from SMC distribution;

2. UnTAR the files to a staging area.

3. Use the 'cp' from the command line to copy the ESDT files, storing these files inaccordance with
local DAAC procedures (dir. where ESDT files are held usually: lib/ess), store in mode by mode, using the same
ownerships and permission levels as existing ESDT files..

4. Then install the ESDTs as needed:
To install/update the ESDTs use the Science Data Server GUI.

5. Remember that for an initial install of an ESDT (NOT FOR UPDATES), an insert for each ESDT should be done through the
Stmgt GUI. It is NOT recommended that these entries be made via an isql insert.!!!!One ESDT per GUI entry
